

Help Make a Difference for Our Robotics Team: FTC Team 6471, the Panthers

What is First Tech Challenge?

First Tech Challenge (FTC) is a national competition designed for students from 7-12 grade and is for those who are willing to dedicate endless amount of time and effort. It is part of the FIRST mission. (FIRST stands for “For Inspiration and Recognition of Science and Technology.”) At FTC, teams are required to design, build, and program a robot that can accomplish the tasks of each season’s game. Additional awards are given to teams who successfully reach out to their community, come up with unique designs for their robots, act together with cooperation and all the characteristics of an inspiring team, and other accomplishments.

Who are the Panthers?

The Panthers are team 6471 in FTC. This is their 3rd year representing their school. **This year the Panthers won the state championship just recently in January 2014.** The Panthers also won a number of prestigious awards such as the Inspire Award and the Think Award which was based off of their outstanding performance at the competitions. To see the highlights of their journey visit their website www.pantherrobotics.weebly.com or contact them for more information at psapanthers@gmail.com.

Sponsor the Panthers:

To be a part of the First Tech Challenge is an incredible and life-changing experience. However, purchasing robot materials, registering for events, and traveling from place to place can become costly and more often than not, financial support is greatly needed in order to continue on this journey that the Panthers have been on. Help the Panthers be able to keep going forward and become a sponsor!
